

# Onet.pl uses AWS to assure business continuity in case of failure

Main requirement for the architecture of our Private Cloud is to be able to run all of our systems from AWS when needed.

**Wojciech Struski**  
Chief IT Architect, Grupa Onet.pl

- Onet operates two datacenters in Kraków, PL
- In disaster recovery case Onet can use Amazon Web Services as main datacenter, whole Onet operations can be smoothly moved to AWS infrastructure
- Onet.pl directs 1% traffic and load to Amazon Web Services infrastructure
- Disaster recovery plan built on Amazon Web Services is a cost-effective solution compared to a new, separate datacenter

Grupa Onet.pl is one of largest among internet and media groups in Poland
